SUMMARY

I am a diligent and enthusiastic software engineer with a strong foundation in core programming concepts and a genuine passion for technology. I thrive on the details and am committed to delivering high-quality solutions. My expertise extends to a variety of programming languages, frameworks, and tools, making me well-equipped to tackle diverse software development challenges.

SKILLS

- **Front-End Development**: HTML, CSS, Javascript, React.
- **RESTful APIs Development**: Node.js Express and NestJS, Python Django and Flask, Golang Gin Gonic and Java Spring Boot.
- **Java Spring Boot Tools** - Spring data JPA, Hibernate
- **Database Systems**: Knowledge of Relational Databases PostgresQL and MySQL and NoSQL Databases MongoDB, Database Design and Management.
- **Version Control Systems**: Utilizing Git for efficient version control.
- **Cloud Services**: Proficient in using AWS Amplify, S3 and Lambda
- **GraphQL**: Possess knowledge of GraphQL
- **Data Analysis** - Using Numpy, Pandas and Matplotlib
- SEO, Web Security and Performance Optimization
- Unit testing
- Docker

EDUCATION

Jomo Kenyatta University of Agriculture and Technology   2019-2022

Degree in Business Information Technology

WORK EXPERIENCE

Full Stack and Mobile Developer | Upwork Freelance   July 2023 - Recent

- In my previous role, I was instrumental in the development of web APIs using Typescript, Java Spring Boot and Golang. This experience allowed me to gain a deep understanding of backend technologies
- Additionally, I undertook the responsibility of data cleaning and data analysis employing Python. This involved the meticulous process of cleansing and structuring data for meaningful insights, ultimately contributing to data-driven decision-making within the organization.
- As part of my multifaceted role, I also served as a front-end and mid-web developer, proficiently utilizing technologies like React and GraphQL. This enabled me to craft engaging and responsive user interfaces, seamlessly connecting them with the backend to deliver an exceptional user experience.

Overall, my contributions to the team were marked by my versatile skill set and commitment to excellence, allowing me to make significant impacts on the projects I worked on.

Intern Full Stack Software Developer | Grubbys Africa   April 2022 - June 2023

At my previous job, I held the position of a Software Engineer, where my primary responsibilities included developing and writing tests using Laravel and JavaScript.

- In this role, I meticulously analyzed complex problems and actively engaged with cross-functional teams to develop optimal solutions. This often involved collaborating with senior management to identify and implement new initiatives aimed at enhancing the overall quality and performance of our applications.

- My technical expertise in utilizing Laravel and JavaScript enabled me to create robust and reliable tests, ensuring the highest level of software quality and reliability. I took pride in my ability to methodically approach issues, resolve them efficiently, and ensure seamless communication within the team.

- Moreover, my close collaboration with senior management allowed us to identify innovative strategies and initiatives aimed at refining our applications, aligning them with industry best practices, and staying ahead of market trends.

CERTIFICATIONS

Python Intermediate, Hackerrank - hackerrank.com/certificates/72392afd4862
